Today's websites contain powerful and dynamic content that can quickly adapt to different conditions. Even as mere users, we have would have heard of one of the most famous programming languages used to make this happen: Javascript.

The thing is that Javascript is a client-side language – meaning that all the heavy lifting of creating the content lies within the user's browser. This may not be very friendly for older systems that do not have the processing power to benchpress all the factors that make an interactive page.

Enter Python – one of the most powerful programming languages around. This language allows you to program content that can be produced by Javascript, and place it server-side. It is also one of the cleanest and friendliest languages around. This book was designed to give you all the basics needed to jumpstart you into the world of Python programming.
