So what is a *senior* romance novel? One, the main characters are older folks; two, these folks are involved with physical or mental disabilities; and three, the book uses large print. The story in *Songs That Remember* centers on Jack and Anna, two caretaking spouses who are bringing their loved ones to a famous clinic to take part in a week-long research study of advanced Alzheimer's disease. Each feels totally responsible for the non-medical care of the patient at home. The two meet each other under a cafeteria table early on the first morning of the study. They find so much in common--years of challenging caregiving, isolation, hopelessness, and worry about when the Grim Reaper will strike and who will be struck first--they or their spouses. As they share experiences, they bond closely. Why did they choose to participate in the study? What made that long scar across Anna's forehead? Why are songs so important to Anna? Could emerging strong feelings be love? Or lust? One week transforms their lives. A portion of the price of this book will be donated to Alzheimer's research.
