Unleashing the Potential of Renewable Energy in India (World Bank Studies) Gevorg Sargsyan, Mikul Bhatia, Sudeshna Ghosh Banerjee, Krishnan Raghunathan, Ruchi Soni

India has 150GW of renewable energy potential, about half in the form of small hydropower, biomass, and wind and half in solar, cogeneration, and waste-to-energy. Developing renewable energy can help India increase its energy security, reduce the adverse impacts on the local environment, lower its carbon intensity, contribute to more balanced regional development, and realize its aspirations for leadership in high-technology industries. This study aims to answer critical questions on why renewable energy development is relevant in Indian context, on how much development is economically feasible, and on what needs to be done to realize the potential. The Report is based on data from nearly 180 wind, biomass, and small hydropower projects in 20 states, as well as information from the Ministry of New and Renewable Energy (MNRE) and the Central Electricity Regulatory Commission (CERC). The Report suggests that about 3GW of renewable energy – all from small hydropower is economically feasible, when the avoided cost of coal-based generation of Rs 3.08/kWh is considered. About 59GW of renewable energy in wind, biomass, and small hydropower is available at less than Rs 5/kWh. The entire cumulative capacity of 68GW in these three technologies can be harnessed at less than Rs 6/kWh. About 62GW?90 percent of cumulative renewable capacity in wind, biomass, and small hydropower?is economically feasible when the environmental premiums on coal are brought into consideration. Realizing the need to bridge this gap, the government has set an ambitious target of installing at least 40GW of additional capacity of renewables in the next 10 years. India has made tremendous strides in establishing overarching policy framework and institutions to bring renewable in the mainstream of energy mix, but significant financial, infrastructure and regulatory barriers to renewable energy development remain which the report sheds light on and suggests possible solutions.

From reader reviews:

Geraldine Davis:

In this 21st centuries, people become competitive in every single way. By being competitive now, people have do something to make these survives, being in the middle of often the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yep, by reading a book your ability to survive raise then having chance to stand than other is high. For you personally who want to start reading a new book, we give you this specific Unleashing the Potential of Renewable Energy in India (World Bank Studies) book as beginning and daily reading book. Why, because this book is usually more than just a book.

Robert Burmeister:

This Unleashing the Potential of Renewable Energy in India (World Bank Studies) tend to be reliable for you who want to be described as a successful person, why. The reason why of this Unleashing the Potential of Renewable Energy in India (World Bank Studies) can be one of many great books you must have is definitely giving you more than just simple reading food but feed an individual with information that maybe will shock your earlier knowledge. This book is usually handy, you can bring it almost everywhere and whenever your conditions at e-book and printed types. Beside that this Unleashing the Potential of Renewable Energy in India (World Bank Studies) giving you an enormous of experience including rich vocabulary, giving you demo of critical thinking that could it useful in your day action. So , let's have it and luxuriate in reading.

Dianne Haire:

Spent a free time to be fun activity to do! A lot of people spent their spare time with their family, or their particular friends. Usually they accomplishing activity like watching television, about to beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? May be reading a book may be option to fill your totally free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the book untitled Unleashing the Potential of Renewable Energy in India (World Bank Studies) can be great book to read. May be it can be best activity to you.

Joseph Mesta:

Many people spending their time period by playing outside using friends, fun activity along with family or just watching TV the whole day. You can have new activity to invest your whole day by examining a book. Ugh, do you think reading a book really can hard because you have to accept the book everywhere? It fine you can have the e-book, having everywhere you want in your Mobile phone. Like Unleashing the Potential of Renewable Energy in India (World Bank Studies) which is keeping the e-book version. So , try out this

book? Let's notice.
