Autonomous Control Systems and Vehicles: Intelligent Unmanned Systems (Intelligent Systems, Control and Automation: Science and Engineering)

Autonomous Control Systems and Vehicles: Intelligent Unmanned Systems (Intelligent Systems, Control and Automation: Science and Engineering)

The International Conference on Intelligent Unmanned Systems 2011 was organized by the International Society of Intelligent Unmanned Systems and locally by the Center for Bio-Micro Robotics Research at Chiba University, Japan. The event was the 7th conference continuing from previous conferences held in Seoul, Korea (2005, 2006), Bali, Indonesia (2007), Nanjing, China (2008), Jeju, Korea (2009), and Bali, Indonesia (2010). ICIUS 2011 focused on both theory and application, primarily covering the topics of robotics, autonomous vehicles, intelligent unmanned technologies, and biomimetics. We invited seven keynote speakers who dealt with related state-of-the-art technologies including unmanned aerial vehicles (UAVs) and micro air vehicles (MAVs), flapping wings (FWs), unmanned ground vehicles (UGVs), underwater vehicles (UVs), bio-inspired robotics, advanced control, and intelligent systems, among others. This book is a collection of excellent papers that were updated after presentation at ICIUS2011. All papers that form the chapters of this book were reviewed and revised from the perspective of advanced relevant technologies in the field. The aim of this book is to stimulate interactions among researchers active in the areas pertinent to intelligent unmanned systems.

From reader reviews:

Donovan Houseman:

Now a day those who Living in the era exactly where everything reachable by connect to the internet and the resources inside it can be true or not require people to be aware of each details they get. How many people to be smart in having any information nowadays? Of course the answer then is reading a book. Reading a book can help individuals out of this uncertainty Information specially this Autonomous Control Systems and Vehicles: Intelligent Unmanned Systems (Intelligent Systems, Control and Automation: Science and Engineering) book because book offers you rich facts and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you know.

Charles Jose:

Nowadays reading books be than want or need but also work as a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge even the information inside the book that improve your knowledge and information. The information you get based on what kind of publication you read, if you want drive more knowledge just go with training books but if you want truly feel happy read one having theme for entertaining like comic or novel. Typically the Autonomous Control Systems and Vehicles: Intelligent Unmanned Systems (Intelligent Systems, Control and Automation: Science and Engineering) is kind of book which is giving the reader capricious experience.

Charles Felton:

Information is provisions for folks to get better life, information currently can get by anyone in everywhere. The information can be a expertise or any news even a problem. What people must be consider if those information which is inside the former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one the resource are convinced. If you receive the unstable resource then you have it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take Autonomous Control Systems and Vehicles: Intelligent Unmanned Systems (Intelligent Systems, Control and Automation: Science and Engineering) as your daily resource information.

Irene Carpenter:

Book is one of source of understanding. We can add our know-how from it. Not only for students but also native or citizen need book to know the upgrade information of year in order to year. As we know those books have many advantages. Beside most of us add our knowledge, can bring us to around the world. From the book Autonomous Control Systems and Vehicles: Intelligent Unmanned Systems (Intelligent Systems, Control and Automation: Science and Engineering) we can acquire more advantage. Don't one to be creative people? For being creative person must love to read a book. Just choose the best book that acceptable with your aim. Don't be doubt to change your life at this book Autonomous Control Systems and Vehicles:

Intelligent Unmanned Systems (Intelligent Systems, Control and Automation: Science and Engineering).
You can more inviting than now.
