Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology)

Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology)

This book presents research into chemical, biological, radiological and nuclear (CBRN) defense and environmental security, exploring practical implications of the research. Contributions from a diverse group of international civilian researchers present the latest work on nanotechnology problems in this area, looking at detection, protective technologies, decontamination and threats to environmental security due to bacteriophages and nanomaterials.

Highlights include the potential of Atomic Force Microscopy (AFM) to characterize the nanoscale properties of microbial pathogens, the development of bacteriophage-based therapeutics, prophylactic and diagnostic preparations and their uses in different fields, such as medicine, veterinary, agriculture, food and water safety, amongst others.

Readers may also consider an inexpensive bioassay suited for assessing chemical poisoning in the environment such as the presence of pesticides, sensors to detect ultra-trace quantities of the explosive Pentaerythritol tetranitrate (PETN) using nanotubes and electrochemical sensors to simultaneously detect and reduce the explosive trinitrotoluene (TNT) to 2,4,6-triaminotoluene (TAT) in solution.

This book shows how cooperative research among NATO countries and NATO partners can make a critical contribution to meeting the opportunities and challenges of nanotechnology problems relevant to chemical and biological defense needs. The papers presented here are representative of contributions made to the Advanced Research Workshop (ARW) on September 22-26, 2014 in Antalya, Turkey, to address the NATO SPS Key Priority of Defense against CBRN Agents and Environmental Security.

From reader reviews:

Courtney Cook:

Do you one of people who can't read satisfying if the sentence chained within the straightway, hold on guys this particular aren't like that. This Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) book is readable by means of you who hate those perfect word style. You will find the info here are arrange for enjoyable studying experience without leaving perhaps decrease the knowledge that want to supply to you. The writer connected with Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) content conveys objective easily to understand by many people. The printed and e-book are not different in the articles but it just different such as it. So , do you still thinking Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) is not loveable to be your top record reading book?

Michael Hansen:

This Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) tend to be reliable for you who want to be a successful person, why. The explanation of this Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) can be one of the great books you must have is definitely giving you more than just simple studying food but feed anyone with information that probably will shock your preceding knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions at e-book and printed kinds. Beside that this Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) giving you an enormous of experience including rich vocabulary, giving you test of critical thinking that we all know it useful in your day action. So , let's have it appreciate reading.

Michelle Jarvis:

Would you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't determine book by its deal with may doesn't work at this point is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer may be Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) why because the excellent cover that make you consider about the content will not disappoint you. The inside or content is actually fantastic as the outside or perhaps cover. Your reading sixth sense will directly direct you to pick up this book.

Cynthia Haynes:

Some people said that they feel bored when they reading a guide. They are directly felt it when they get a

half parts of the book. You can choose often the book Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) to make your current reading is interesting. Your skill of reading ability is developing when you such as reading. Try to choose very simple book to make you enjoy you just read it and mingle the impression about book and reading through especially. It is to be first opinion for you to like to open up a book and go through it. Beside that the e-book Nanotechnology to Aid Chemical and Biological Defense (NATO Science for Peace and Security Series A: Chemistry and Biology) can to be your brand new friend when you're really feel alone and confuse in doing what must you're doing of the time.
