Avogadro Corp: The Singularity Is Closer Than It Appears William Hertling

David Ryan is the designer of ELOPe, an email language optimization program, that if successful, will make his career. But when the project is suddenly in danger of being canceled, David embeds a hidden directive in the software accidentally creating a runaway artificial intelligence.

David and his team are initially thrilled when the project is allocated extra servers and programmers. But excitement turns to fear as the team realizes that they are being manipulated by an A.I. who is redirecting corporate funds, reassigning personnel and arming itself in pursuit of its own agenda.

"A fictional world where Portland is the hub for the most exciting advancements in technology... Jam packed with great references to deep Portland culture...and Portlandia-type references"

--SILICON FLORIST

"Hertling builds a picture of how an AI could emerge, piece by piece, from technology available today. A fascinating, logical, and utterly believable scenario - I just hope nobody tries this at home."

--Nathaniel Rutman, Senior Systems Architect
