The Risks of Hypertension High Blood Pressure

No warning, no significant early symptoms are trademarks of one of the deadliest diseases on earth commonly known as hypertension or high blood pressure. It is no longer an "old person's disease" because thousands of strokes occur in people under the age of 65 years.

Dr. W. Lee Cowden, M.D says: *"High blood pressure often occurs due to a strain on the heart, which can arise from a variety of conditions, including diet, atherosclerosis [hardening of the arteries], high cholesterol, diabetes, environmental factors, as well as lifestyle choices. When these factors combine with a genetic predisposition, hypertension can occur in two out of three individuals."*

The undue pressure in the arteries slowly erodes the arteries and organs and increases the risk of stroke, congestive heart failure, kidney failure and heart attack.

If high blood pressure is combined with factors such as obesity, smoking, high cholesterol or diabetes, the risk of heart attack or stroke increases dramatically - as much as 400% and more!
