Twist and Shout

James E Beichler

Twist and Shout James E Beichler

This is the fascinating history of William Kingdon Clifford, a Cambridge mathematician and geometer who tried to develop a unified field theory based on a Riemannian geometry several decades before Einstein. He died the same year Einstein was born. His theory accounted for both electromagnetism and gravity more than a century before theories of everything (TOEs) became popular in science. Yet he was talking about the same thing, although he did not use the term quantum to describe the microscopic world of physics. Instead he developed a new point-based geometry of biquaternions and twists to explain curved space and physical phenomena. As early as 1870, Clifford stated that matter was merely curved space and the motion of matter was no more than ripples or waves across that curvature. This was almost a century before Einstein developed the general theory of relativity which makes the same claim. But Clifford thought in grander terms and meant all types of motion while Einstein only used the concept of space-time curvature to explain gravitational motion. Clifford was a philosopher, mathematician and physicist who is well remembered in history for his purely mathematical accomplishments, but equally well forgotten for his greatest accomplishments in the physical application of his mathematical systems. His “space-theory of matter” is considered no more than an “untenable” speculation that pre-dated Einstein’s later discovery. Paradoxically, the closer present science comes to unifying the quantum and relativity, the closer it comes to realizing some of Clifford’s original concepts regarding the curvature of space.

From reader reviews:

Joshua Stamper:

Have you spare time for any day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a wander, shopping, or went to typically the Mall. How about open or even read a book called Twist and Shout? Maybe it is being best activity for you. You understand beside you can spend your time with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have additional opinion?

Gerald Conway:

A lot of people always spent their own free time to vacation or go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, or even playing video games all day long. If you need to try to find a new activity this is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book you read you can spent the whole day to reading a reserve. The book Twist and Shout it doesn't matter what good to read. There are a lot of people that recommended this book. We were holding enjoying reading this book. When you did not have enough space bringing this book you can buy the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not to fund but this book provides high quality.

Rene Defeo:

You may get this Twist and Shout by look at the bookstore or Mall. Simply viewing or reviewing it may to be your solve issue if you get difficulties for your knowledge. Kinds of this guide are various. Not only by means of written or printed but also can you enjoy this book by simply e-book. In the modern era just like now, you just looking from your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose correct ways for you.

Stan Smith:

Do you like reading a guide? Confuse to looking for your selected book? Or your book seemed to be rare? Why so many question for the book? But any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but novel and Twist and Shout as well as others sources were given expertise for you. After you know how the good a book, you feel would like to read more and more. Science publication was created for teacher as well as students especially. Those publications are helping them to increase their knowledge. In additional case, beside science book, any other book likes Twist and Shout to make your spare time far more colorful. Many types of book like this.
