Product and Systems Development: A Value Approach Stanley I. Weiss

A thorough treatment of product and systems development in terms of value to all stakeholders

Product and Systems Development compiles more than twenty years of research and practice from a value perspective, from vision and marketing to design, manufacturing, delivery, operations, and maintenance. It defines stakeholder value and identifies specific stakeholders in the product and system development process; covers best practices in development; and examines systems engineering, current industry views, and the life cycle of a value stream.

Featuring appendices written by professionals in the field on topics such as Design Structure Matrices, Lean Enablers for systems engineering, and MDAO and simulations, this indispensable guide:

- Explains why stakeholders' values can hold the key to fulfillment or defeat of the developer's vision
- Emphasizes the succession of value-contributing practices and tools that form a framework for development success
- Integrates the technical, productivity, and customer/end-user elements in product and system development
- Uses more than 100 tables and figures to illustrate the above processes, as well as corollary elements of risk, failure analysis, and fault-tolerant design
- Includes numerous case studies and links to online material

Product and Systems Development is an excellent coursebook for senior and graduate students in aerospace, mechanical, civil, electrical, and material engineering, as well as management science and engineering. It is also a useful reference for practicing engineers in a variety of technology-based industries.

From reader reviews:

Matthew Armstrong:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each guide has different aim or maybe goal; it means that book has different type. Some people truly feel enjoy to spend their time and energy to read a book. They can be reading whatever they consider because their hobby will be reading a book. What about the person who don't like examining a book? Sometime, person feel need book after they found difficult problem as well as exercise. Well, probably you will want this Product and Systems Development: A Value Approach.

Lawrence Weatherby:

Nowadays reading books become more and more than want or need but also work as a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book which improve your knowledge and information. The data you get based on what kind of e-book you read, if you want get more knowledge just go with schooling books but if you want experience happy read one along with theme for entertaining such as comic or novel. Often the Product and Systems Development: A Value Approach is kind of guide which is giving the reader unpredictable experience.

Martha Robertson:

Reading a reserve tends to be new life style with this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Having book everyone in this world can easily share their idea. Publications can also inspire a lot of people. Plenty of author can inspire their reader with their story or their experience. Not only the story that share in the publications. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors these days always try to improve their proficiency in writing, they also doing some investigation before they write with their book. One of them is this Product and Systems Development: A Value Approach.

Cheryl Fisher:

Playing with family within a park, coming to see the marine world or hanging out with pals is thing that usually you may have done when you have spare time, then why you don't try point that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Product and Systems Development: A Value Approach, you are able to enjoy both. It is good combination right, you still need to miss it? What kind of hangout type is it? Oh come on its mind hangout people. What? Still don't understand it, oh come on its known as reading friends.
