ENVIRONMENTAL ENGINEERING K.P. Ramakrishnan, M. Vijaya Chandran, P. Srinivas, G. Sudarmozhi

The understanding of the biodiversity will make it possible for its preservation and conservation for sustainable development. Environmental Eco-technology is gaining its reputation as a technology for cleaning the environment, due to the hard work of skilled and dedicated scientists. The new emerging approaches and distinguished tools are being documented within a number of areas rapidly. Environmental Eco-technologies are competing with great successes against traditional technologies and are providing solution to the various environmental problems through the application and/or treatment technologies. The national development programmes in many countries has been considered as one of the strategic areas involving edge technologies and promoting new innovations for their application in development of product/processes and technologies for solving the current environmental problems and providing the long term solutions to environmental development. This book is aimed at providing information at various levels to the University Post Graduate students and Research Scholars studying in the area of Eco-technology/Environmental Sciences/Life Sciences and other multidisciplinary sciences and technologies.
