Pitch: Neural Coding and Perception (Springer Handbook of Auditory Research)

Pitch: Neural Coding and Perception (Springer Handbook of Auditory Research)

Although pitch has been considered an important area of auditory research since the birth of modern acoustics in the 19th century, some of the most significant developments in our understanding of this phenomenon have occurred comparatively recently. In auditory physiology, researchers are now identifying cells in the brainstem and cortex that may be involved in the derivation of pitch. In auditory psychophysics, dramatic developments over the last few years have changed our understanding of temporal pitch mechanisms, and of the roles of resolved and unresolved harmonics. Computational modeling has provided new insights into the biological algorithms that may underlie pitch perception. Modern brain imaging techniques have suggested possible cortical locations for pitch mechanisms.

This timely volume brings together the more recent findings, while emphasizing their relation to the discoveries of the past. It brings together insights from several different methodological areas: physiology, psychophysics, comparative, imaging, etc., in addressing a single scientific problem. Pitch perception can be regarded as one of the main problems of hearing, and the multidisciplinary approach of the book provides a valuable reference source for graduate students and academics.

From reader reviews:

Ryan Daggett:

Do you have favorite book? If you have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each e-book has different aim or even goal; it means that reserve has different type. Some people feel enjoy to spend their time to read a book. They are really reading whatever they acquire because their hobby is usually reading a book. What about the person who don't like looking at a book? Sometime, person feel need book after they found difficult problem or perhaps exercise. Well, probably you should have this Pitch: Neural Coding and Perception (Springer Handbook of Auditory Research).

Jennifer Frederick:

This book untitled Pitch: Neural Coding and Perception (Springer Handbook of Auditory Research) to be one of several books in which best seller in this year, this is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this particular book in the book retail outlet or you can order it by means of online. The publisher of the book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smartphone. So there is no reason to you to past this reserve from your list.

Lewis Skinner:

The e-book untitled Pitch: Neural Coding and Perception (Springer Handbook of Auditory Research) is the reserve that recommended to you to read. You can see the quality of the e-book content that will be shown to anyone. The language that creator use to explained their ideas are easily to understand. The article writer was did a lot of analysis when write the book, so the information that they share to you personally is absolutely accurate. You also might get the e-book of Pitch: Neural Coding and Perception (Springer Handbook of Auditory Research) from the publisher to make you a lot more enjoy free time.

Kimberly Moore:

The publication with title Pitch: Neural Coding and Perception (Springer Handbook of Auditory Research) has a lot of information that you can learn it. You can get a lot of profit after read this book. This kind of book exist new knowledge the information that exist in this e-book represented the condition of the world now. That is important to yo7u to be aware of how the improvement of the world. This book will bring you inside new era of the glowbal growth. You can read the e-book with your smart phone, so you can read this anywhere you want.
