Practical Electrical Network Automation and Communication Systems (IDC Technology) Cobus Strauss CPEng

In the past automation of the power network was a very specialized area but recently due to deregulation and privatization the area has become of a great importance because companies require more information and communication to minimize costs, reduce workforce and minimize errors in order to make a profit.

- * Covers engineering requirements and business implications of this cutting-edge and ever-evolving field
- * Provides a unique insight into a fast-emerging and growing market that has become and will continue to evolve into one of leading communication technologies
- * Written in a practical manner to help readers handle the transformation from the old analog environment to the modern digital communications-based one
