Occupational Therapy Practice and Research with Persons with Multiple Sclerosis Marcia Finlayson
Discover strategies to enhance quality of life and promote social and community participation for people with MS!

Occupational Therapy Practice and Research with Persons with Multiple Sclerosis will familiarize you with the complex issues experienced by people who have multiple sclerosis, suggesting ways to enhance your practice or research with this population. This vital resource fills a void in the scarce literature on occupational therapy and multiple sclerosis, providing you with a unique single-source reference on the subject. This book compiles the work and contributions of experts from Europe, Australia, Canada, and the United States—from a variety of fields, including occupational therapy, medicine, physical therapy, and psychology.

This thought-provoking book offers new perspectives on potential assessment and intervention ideas and provides information that could be used for broader program planning. This extensive resource will give you a deeper appreciation of the MS disease process and its influence on everyday living for persons with MS and their families. In this collection, you will learn more about:

- the health-related service needs of older adults with MS
- the range of fatigue assessment tools that are available for clinical and research applications
- the effect of wheelchair use on quality of life
- the implications of tremor on everyday activities
- the development and use of Lifestyle Management Programs©
- coping processes used by women with MS as they age
- the symptom and functional limitation profiles experienced by people with MS that lead to referrals to occupational therapy

Occupational Therapy Practice and Research with Persons with Multiple Sclerosis contains charts, figures, graphs, and bibliographies to augment the research and studies found in this book. Also provided are contributions by Dr. Nicholas G. LaRocca—a well-known MS researcher—and Dr. Carol A. Gaetjens—an educator with MS. Occupational therapy students, clinicians, and researchers working with individuals and families who are affected by MS will find this book an important resource in their profession.

Beatrice Flanagan:

As we know that book is vital thing to add our know-how for everything. By a reserve we can know everything we wish. A book is a list of written, printed, illustrated or even blank sheet. Every year seemed to be exactly added. This book Occupational Therapy Practice and Research with Persons with Multiple Sclerosis was filled with regards to science. Spend your extra time to add your knowledge about your science competence. Some people has distinct feel when they reading some sort of book. If you know how big good thing about a book, you can truly feel enjoy to read a publication. In the modern era like right now, many ways to get book you wanted.

Jason Wahl:

As a college student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or even make summary for some guide, they are complained. Just little students that has reading's internal or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that studying is not important, boring along with can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Occupational Therapy Practice and Research with Persons with Multiple Sclerosis can make you truly feel more interested to read.
