**Fiber Optic Sensors Based on Plasmonics** Banshi Dhar Gupta, Sachin Kumar Srivastava, Roli Verma

The book provides an introduction of surface plasmons and presents its applications in the sensing of various chemical and biological analyses using optical fiber technology. The field is developed by introducing the surface plasmons for semi-infinite metal–dielectric interface with discussion of their propagation length and penetration depth. Practical issues with the excitation of surface plasmons in different configurations and in various geometries including various means of their excitation have also been included. The book discusses the essential components of fiber optic sensors, their functions and the performance parameters along with the theoretical description of fiber optic Surface Plasmon Resonance (SPR) sensors with respect to various light launching conditions. The fabrication methods and protocols used for the fabrication of the fiber optic SPR chemical and biosensors have been described. Some fiber optic sensing applications based on SPR phenomena and various issues, such as sensitivity enhancement, influence of external stimuli etc, have been an important part of the book.

The book will help beginners as well as established researchers in understanding the fundamentals and advancements of optical fiber plasmonic sensor technology. The book contains both the rigorous theory and the experimental techniques of SPR and related variety of sensors.

Readership: Beginners as well as established researchers who are interested in the fundamentals and advancements of optical fiber plasmonic sensor technology.

**From reader reviews:**

**Sally Rose:**

Within other case, little men and women like to read book Fiber Optic Sensors Based on Plasmonics. You can choose the best book if you appreciate reading a book. As long as we know about how is important any book Fiber Optic Sensors Based on Plasmonics. You can add understanding and of course you can around the world by the book. Absolutely right, since from book you can understand everything! From your country until foreign or abroad you may be known. About simple matter until wonderful thing you could know that. In this era, we can open a book or perhaps searching by internet system. It is called e-book. You should use it when you feel fed up to go to the library. Let's study.

**John Bradley:**

Nowadays reading books become more and more than want or need but also be a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The information you get based on what kind of guide you read, if you want drive more knowledge just go with training books but if you want really feel happy read one along with theme for entertaining for instance comic or novel. The Fiber Optic Sensors Based on Plasmonics is kind of book which is giving the reader unpredictable experience.

**James McNally:**

Reading can called imagination hangout, why? Because if you are reading a book specifically book entitled Fiber Optic Sensors Based on Plasmonics the mind will drift away trough every dimension, wandering in each aspect that maybe unidentified for but surely will become your mind friends. Imaging every word written in a guide then become one type conclusion and explanation which maybe you never get previous to. The Fiber Optic Sensors Based on Plasmonics giving you one more experience more than blown away your mind but also giving you useful details for your better life on this era. So now let us present to you the relaxing pattern the following is your body and mind are going to be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

**Jesse Ward:**

This Fiber Optic Sensors Based on Plasmonics is great publication for you because the content which is full of information for you who always deal with world and also have to make decision every minute. This specific book reveal it details accurately using great manage word or we can say no rambling sentences within it. So if you are read that hurriedly you can have whole information in it. Doesn't mean it only provides straight forward sentences but difficult core information with wonderful delivering sentences. Having Fiber Optic Sensors Based on Plasmonics in your hand like obtaining the world in your arm, facts in it is not ridiculous 1. We can say that no guide that offer you world in ten or fifteen second right but this e-book already do that. So , this is certainly good reading book. Hello Mr. and Mrs. occupied do you still doubt

this?
