Taking up nursing is probably one of the best decisions you have made. This is because aside from belonging to one of the professions with the most lucrative compensation and benefits package, being a nurse also allows you to touch patients positively. It all sounds so good, right? It does, until you remember that the NCLEX® test plan, and even your nursing school examinations, includes questions about labs and how these lab values relate to patient care. And when this happens, most students worry if they will be able to answer those questions appropriately, or if they can memorize vast information about these labs on top of other concepts needed to be remembered.

Like me, you don't have the time to wade through extraneous foreword and pretentious terms to get to the point. That is exactly why I created the EASY Nursing Lab Guide filled with content you are most likely to see on the NCLEX® and be tested on during nursing school.

Contents of Easy Nursing Lab Guide:

- 1) Blood Work-Up
- 2) Urine and Stool Exams
- 3) Respiratory Function Tests
- 4) Tests for Diseases of the Heart
- 5) Endocrine System Tests
- 6) Cancer Markers and Studies
- 7) HIV and Other Special Tests
- 8) Imaging Studies
- 9) *BONUS* Practice Test
